## References

Other relevant quotes from the ASFPM paper for this committee's report and hurricane and storm surge protection in New Orleans are: In those cases in which a levee is found to be an appropriate measure to protect urban areas or to be credited for protection, the levee should be constructed to a high level of protection.

## Vulnerability of the oil and gas sector to climate change and extreme weather events

The peat is from the remains of the swamp on which the low area of New Orleans near Lake Ponchartrain were built.
