### What is ADHD?

Treatments In most cases, ADHD is best treated with a combination of behavior therapy and medication.

### The ADHD Report

The symptoms continue, can be severe, and can cause difficulty at school, at home, or with friends. One step of the process involves having a medical exam, including hearing and vision tests, to rule out other problems with symptoms like ADHD.

### The ADHD Report

In addition to behavioral therapy and medication, having a healthy lifestyle can make it easier for your child to deal with ADHD symptoms.

### What is ADHD?

Their website has links to information for people with ADHD and their families. Of course, many things, including these, might make symptoms worse, especially in certain people.

### What is ADHD?

For more information on services for children with special needs, visit the To find the Parent Center near you, you can ADHD in Adults ADHD can last into adulthood. The symptoms can cause difficulty at work, at home, or with relationships. Recent studies of twins link genes with ADHD.
