These changes in verbal and nonverbal styles are done through two ways: divergence and convergence.

Religion, Culture, and Communication

How one communicates is the basis of the social view point. Human Communication Theory and Research introduces students to the growing body of theory and research in communication, demonstrating the integration between the communication efforts of interpersonal, organizational, and mediated settings. While each box will focus on a specific aspect of communication competence, this box addresses communication competence more generally.

Religion, Culture, and Communication

Conversely, people with identities that are dominant or in the majority may rarely, if ever, think about the role their cultural identities play in their communication.

A toolkit for developing bilingual lexicons for international HIV prevention clinical trials.

Introduction to Communication: Chapter 1

Other languages may use to express similar meanings different structures, such as reflexives or impersonal expressions e. While the content of our communication may help us achieve certain physical and instrumental needs, it also feeds into our identities and relationships in ways that far exceed the content of what we say. Instrumental Needs Instrumental needs include needs that help us get things done in our day-to-day lives and achieve short- and long-term goals.
