## AIAA/IEEE Electric Aircraft Technologies Symposium (EATS)

Sixty-five years ago, the Labatt Brewing Company developed a streamlined truck for advertising purposes and to provide larger capacity and higher cruising speeds, Figure 1. The present effort focuses on such situations; first on developing a structural reduced-order model ROM which could be used in aeroelastic analyses. For example, searching for  $t^*$  The results agree well with some popular local methods and perform better in regions of strong shearing.

A term combined with a phrase will be joined with an OR operator. However, using hydrogen as an aviation fuel comes with significant challenges, including the need for large fuel tanks for storage, the energy required to create it, and the financial cost.
