## Christian Science in East Germany: The Church that Came in from the Cold by Gregory Sandford

The number of doctoral students and scientific staff in qualifying jobs is steadily rising. Over the following centuries, many universities educated the administrators of the many principalities in particular, which existed within the region known as Germany today. Analysts say this is a legacy of the East German state obliging its citizens to carry out supposedly voluntary activities, thereby giving it a negative connotation, and that civil society is still less developed in the former east.

### [PDF] Christian Science In East Germany

Ossis and Wessis spend similar amounts on telecommunications, telephones and television sets. There were no fees charged for the full-day care in kindergartens and there were enough places for 94% to 99% of East German children. But nevertheless other subjects like arts, music and so forth were not neglected but emphasised to be important for an all-around, gapless general education.

### Tradition meets high technology: science in Germany

Entry to the EOS was after grade 8 for 4 years. He also lived and worked as an exchange student in East Germany while researching his doctoral dissertation. The children stayed together in the same group with the same group educator during the three years.
