How Do Flowers Become Fruit?

In the wild, plants generally produce enough flowers for abundant fruiting, thereby ensuring that seed is dispersed, even if the parent plant suffers damage.

From Flower to Fruit

In order for the blossoms to become apples, they must be cross-pollinated.

From Flower to Fruit

Butterflies can see colours and studies have shown that red is their favourite color, making it no wonder that they often visit the Javanese Ixora. For more information about the flora and fauna found in Singapore, please visit NParks. Apples are great fruit trees to plant in your yard; with a variety of uses from fresh eating to apple sauce, apple pie, apple cider, apple cider vinegar, and the list goes on.

From Flower to Fruit

They merely identify your browser and device. While the Coral Vine attracts honey bees and stingless bees, the Blue Snakeweed attracts Cloak-and-Dagger Bees *Thyreus* spp. They help to ensure the regeneration and survival of many different plants.
