

Measurement of the muonic branching ratio of the [tau] lepton using the OPAL detector at LEP

University of Birmingham - MEASUREMENT OF THE TAU(

Description: -

-Measurement of the muonic branching ratio of the [tau] lepton using the OPAL detector at LEP

-Measurement of the muonic branching ratio of the [tau] lepton using the OPAL detector at LEP

Notes: Thesis (Ph.D) - University of Birmingham, School of Physics and Space Research, Faculty of Science, 1997.

This edition was published in 1996

Measurement of the leptonic branching ratios of the τ lepton

Set Description Number of events $\times 10^6$ num. There are other extensions such as supersymmetry, but the expected modifications to $P_{\pi\mu\xi}$ are beyond the 6The hard scattering is needed since a high energy positron may experience significant energy loss in the target a few MeV , and end up being reconstructed at a lower energy; if the simulation does not behave in the same way, this would result in an incorrect η measurement.
