And it need not here be further dwelt upon, than to notice, that if it avails anything, it applies with an equal force against the study of Logic.

**The Mathematical Analysis Of Logic : George Boole : 9780548710524**

Thus the abstractions of the modern Analysis, not less than the ostensive diagrams of the ancient Geometry, have encouraged the notion, that Mathematics are essentially, as well as actually, the Science of Magnitude. We might justly assign it as the definitive character of a true Calculus, that it is a method resting upon the employment of Symbols, whose laws of combination are known and general, and whose results admit of a consistent interpretation. In like manner the symbol  $y$ , operating upon any subject, shall be supposed to select from it all individuals of the class  $Y$  which are comprised in it, and so on.
