## GPS Made Easy : Using Global Positioning Systems in the Outdoors

A touchscreen model with automatic routing — like the — is a great option that can double as both a driving GPS and for off-road travel. Some of these qualities are undeniably more important than others, namely reception and ease of use — without the accuracy of a satellite and efficiency of a GPS, you might as well be using a map and compass! Photo: Jared Vilhauer We found that the highest performing — but unfortunately, also often the most expensive — models tend to achieve the best satellite reception.
