Secondary power systems for advanced rotorcraft, (Book, 1975) [perssongroup.materialsproject.org]

Unique Failsafe Design Unlike other solid-state products, the SPDU contains patented circuitry that prevents a failure in a short-circuited condition. Other applications supported include the Boeing Apache, Super Hornet and 777 aircraft; the Lockheed Martin C130J and F35; and the Gulfstream 650. .

DTIC AD0739480: Secondary Power System Study for Advanced Rotary Wing Aircraft : Defense Technical Information Center : Free Download, Borrow, and Streaming : Internet Archive

Secondary power systems for advanced rotorcraft. This paper provides information for aircraft designers charged with the task of defining secondary power systems for advanced military aircraft.

Smart Power

Follow GE Aviation on and. Our proven SPDU system design uses less cockpit panel space and reduces wiring and circuit breaker requirements for lower overall system weight and more space for other equipment. The E-mail message field is required.

Secondary Power Systems For Advanced Rotorcraft. (1975 edition)

Our engineers collaborate with top researchers at the and have access to the breakthrough innovations of GE Global Research.
