

Reading EEGs - a practical approach

Lippincott Williams & Wilkins - Reading EEGs A Practical Approach, 1st Edition (2010) (PDF)
L. John Greenfield Jr.

Table 2 Continued

Specific signs and symptoms
Myoclonic features or movement disorder—anti-MAGPAC encephalitis, rabies, Creutzfeldt-Jakob disease
Persistent limbic symptoms—autoimmune limbic encephalitis, HSV-1
Rapid decompensation particularly with recent life history or prior travel to rabies-endemic areas—rabies
Respiratory symptoms—Mycoplasma pneumoniae, respiratory viruses
Acute flaccid paralysis—WNV and other arboviruses, rabies
Parosmia—Arbovirus, Toxoplasma
Nonhealing skin lesions—Borrelia burgdorferi, Acrometabolism
Laboratory features
Isolated lymphocytosis—Lyme disease, tick-borne diseases
CSF protein >150 mg/dL, or CSF glucose <25 peripheral glucose, or lymphocytic pleocytosis with tubercle specimen smear—MTB and fungal testing
CSF protein >150 mg/dL, or CSF glucose <25 peripheral glucose and microchloidal pleocytosis with acute specimen smear and recent antibiotic use—S pneumoniae and Haemophilus meningitis
CSF immunoglobulin—MTB and fungal testing, Borrelia burgdorferi, Angiostrongylus cantonicus, Cryptosporidium sp.
Epileptiform in CSF—HSV
Hypomagnesemia—anti-VGCC, MTB
Neuroimaging features
Frontal lobe—H. boeckii
Temporal lobe—anti-VGCC basal ganglia or thalamus, Arbovirus, MTB
Brainstem—Arbovirus, Ischemia, Brucella, MTB
Cerebellum—Epstein-Barr virus
Diffuse cerebral edema—respiratory virus testing
Neuroimaging or neuroimaging features—MTB and fungal infections, B. burgdorferi and Acrometabolism, Streptococcus meningitis
Hydrocephalus or basilar meningitis—enhancement—MTB and fungal infections
Infection or hemorrhage—MTB and fungal infections, respiratory virus testing
Incomplete ring-enhancing lesions—ADEM

Abbreviations: ADEM = acute disseminated encephalomyelitis; CMV = cytomegalovirus; HIV = human immunodeficiency virus; HSV = herpes simplex virus; IgG = immunoglobulin G; IgM = immunoglobulin M; MAGPAC = MAGPAC receptor; VCC = varicella-zoster virus; WNV = West Nile virus.
 *Adapted from reference 7 (Verhaeghen et al. Clinical Infectious Diseases 2013;57:1114–1128) by permission of Oxford University Press on behalf of the Infectious Diseases Society of America.
 This table is not intended to encompass all causes of encephalitis, nor all epidemiologic or laboratory-based risk factors. The information within this table is a guideline for initial management of acute encephalitis in adults.
 *Lumbar puncture is recommended in all individuals with suspected encephalitis unless contraindicated. CSF may show pleocytosis, elevation of total protein, oligoclonal bands, and/or evidence of acute infection in specific pathogen cultures. CSF.
