## Research Summary Examples

Thus, the 1970s represent a watershed in the program's history—program growth gave way to increasing concerns about the program's finances. To streamline the device development process, we have developed an open-source program called ColorScan that can automatically recognize and measure signal-containing zones from images of devices, regardless of output zone geometry or spatial arrangement. This requirement keeps the document short enough to be read by your audience, but long enough to allow it to be a complete, stand-alone synopsis.
