## DCL

The inscriptions are written in a stylish seal script. The reverse sides of kai yuan tong bao coins frequently have or other symbols. The diameter of this bronze cash coin is 24 mm and the weight is 3.

## DCL

These small iron coins are very rare. The Tao is more commonly expressed in the relationship between void or emptiness, in the sense of and the natural dynamic balance between opposites , leading to its central principle of inaction, or inaction. Balance of characters on seal bottom is achieved by simplifying 𠂇Shu".

## Cosmic Neutrinos and Multi

The calligraphy is similar to that of the of the. The characteristic of this type of spade money is that it has a round handle, round shoulders and round feet.

## 宇津峰城

I really enjoyed his song in Ancient Sword,I put it in my mp3 player and listened to it everyday.

## Jing Feng Zhi

They could not be lead, iron or mixtures of these metals. This is the last Chinese cash coin produced in China and was cast in Dongchuan, Yunnan.

## Dao feng zhi xian = (1998 edition)

The results, however, were not quite as disastrous as in Wang Mang's case because many of the coins in circulation were cast by and these small coins weighed only about one gram each. These machine-made coins were struck with two different inscriptions. Several of experiments were carried out, the experimental results show that surface roughness can be achieved for Ra 0.

**Shenzhen Sni Jin Da Feng Su Jiao Wu Jin Zhi Pin You Xian Gong Si, SHENZHEN SHI BAO AN QU SONG GANG JIE DAO DAN  
TOU XI BU GONG YE YUAN QU B29 DANG 3 LOU SHENZHEN CITY, GUANGDONG GUANGDONG PROVINCE**

The coin has a diameter of 44. While a ban liang from the Qin Dynasty averaged about 8 grams, the average weight of an elm seed ban liang was only slightly more than 1 gram. These parameters provided key technical basis for the establishment and optimization of HSM parameters.
