## Hydroelectric plant construction cost and annual production expenses / Energy Information Administra...

The plants for which data are included in this publication are a cross-section of large 10 MW and greater hydroelectric projects of several classes of ownership, including private, municipal, public power district, and federal. Thus these costs include expenditures made over several years.

## Historical plant cost and annual production expenses for selected electric plants, 1982 (Technical Report)

Of these 470 plants, 464 are in the contiguous US, 3 are in Alaska, and 3 are in Puerto Rico. The installed capacity of these gas turbine electric plants at the end of 1975 was 44,106 megawatts, up 11.

## Frontier Production Function Estimates for Steam Electric Generation: A Comparative Analysis on JSTOR

Currently, SEA has approximately 1,000 members worldwide, and more than 1,000 additional institutional subscribers to the journal.

## Hydroelectric plant construction cost and annual production expenses / Energy Information Administra...

The publication is composed of detailed tabular data for each plant. Also reported are data on installed generating capacity, net generation, net capability, fuel consumption, and physical plant characteristics. Working through each cost item will also address many of the operational needs that require attention when bringing a new plant online.

## Production costs: Operating steam

These data are included on the accompanying plant data sheets. A glossary and technical notes are included. Data for plants located in Puerto Rico appear last.

**Hydroelectric plant construction cost and annual production expenses, 1977: twenty**

Toward this end, the organization seeks to stimulate interest in and disseminate results of recent research in theory, policy making, business practices, and regulation.
