The Epidemiology of Cocaine and Opiate Abuse in Urban Canada

Today, although the exact nature of the link between drugs and crime remains uncertain, the scientific literature shows that the drugs-crime connection is much more complex than originally believed. Their main sources of income were employment 48% and government benefits 42%.

Marijuana and tobacco use among young adults in Canada: are they smoking what we think they are smoking?

Regarding the latter point, technology has drastically changed the way we interact with one another, and thus, we are able to build social contexts that do not require face-to-face interaction.

Canadian Alcohol and Drug Use Monitoring Survey

It is particularly challenging to provide policy-relevant information on women in the area of substance use and misuse, as the topic covers such broad territory. Research on the lifestyle and economic behaviour of heroin addicts in Amsterdam has indeed shown that 21% of the study sample reported not committing any crime prior to or during the research.

Substance use and abuse among college students: a review of recent literature

Statistics Canada: Canadian Community Health Survey Cycle 1. In contrast, the frequency of alcohol use i. Hill SY: Vulnerability to the biomedical consequences of alcoholism and alcohol-related problems among women.

Substance use and abuse among college students: a review of recent literature

In: Handbook of psychology and medicine. PURDUE Pharma are alternative sources of information on the dispensing practices of physicians.

National Epidemiologic Survey on Alcohol and Related Conditions

In State prisons, 32% of inmates reported they were under the influence of alcohol, and 31% reported they were under the influence of drugs including 14% who were under the influence of both when they committed their current offence.
