***Abies balsamea* (L**

A smaller tree to 25—35 m 80—115 ft tall, rarely 45 m 150 ft. The space required for the continual development and establishment of new seedlings probably exceeds that created by the removal of individual trees. To the south in Mexico, it is replaced by further close relatives, *A.*

***Abies concolor* (Gord**

The Spanish fir is closely related to the Moroccan fir which has slightly longer cones on it.

***Abies balsamea* (L**

White fir is represented in at least 14 forest cover types of western North America.

White fir

In the white fir-grand fir complex of Idaho, the fungus was found in 97 percent of the trees that had decay.

Grand Fir

Regional silviculture of the United States. A comparably impressive forest, still containing fairly large trees, can be seen high on Mt.
