Eastern & Southern Africa

Yet they are not easily accessible. Additionally, some countries that are currently not water stressed are likely to experience stress in the future Niang et al. A recurring theme in the webinars is the need for sharing of knowledge and collaboration on response strategies.

Agricultural opportunities in Africa

It is estimated that the livelihoods of 70 % of Africans are dependent on rain-fed agriculture, an activity that is characterized by small-scale, subsistence farms that are vulnerable to a variety of stresses, including

reset button on policies to alleviate food security problems. In Ghana, Codjoe et al. Sustainable livelihood approaches have shown themselves to be useful in capturing the processes and contextual factors that shape adaptive capacity Scoones ; Carney ; Scoones.

Food Crop Production by Smallholder Farmers in Southern Africa

The need for greater efforts also emerges clearly from the findings of the inaugural biennial review of progress in implementing the goals of the Malabo Declaration. Large parts of southern and western Zambia received their lowest seasonal rainfall totals since at least 1981, the base year from which normal rainfall is benchmarked, while the northern and eastern parts of the country were affected by flash floods and waterlogging, resulting in poor harvests. In conclusion, the fact that we are able to discuss food security in Africa, and that there are many resources available that address the topic, is evidence that there are solutions as well.

Addressing the risk on Food Security in Southern Africa during the COVID

Governments must step up efforts to help youth acquire skills, resources and the opportunity to participate in decisionmaking and policy dialogue. The method of execution was to be the Expropriation Bill, but the Constitutional Court halted the land reform process for 18 months.

Climate Change, Food Security and Sustainable Development in Africa

Other research documents the stressors to which people adapt.

Climate change, food security, and livelihoods in sub

Many households are often primarily dependent on migrant remittances and social security grants, making them vulnerable to food insecurity 2. Drawing on the positive lessons from the , the regional charter would seek to ensure fair relations between suppliers and supermarket chains. The implications for human well-being fall outside the scope of this work, and the consequences of climate change on human livelihoods are not explicitly analyzed.
