## Frequent Questions about the 2015 Coal Ash Disposal Rule

Since all unlined CCR impoundments must now close or retrofit, this clarification is no longer relevant. Does the final rule define beneficial use of coal combustion residual? However incomplete submissions will not toll the facility's deadline; here the equities lie squarely against granting any more time.

## Solid Waste Management Services, Plans, Solutions

These higher concentrations of trace elements in the roof strata are higher than those in the floor despite the fact that the floor ash content is somewhat higher than the ash content of the roof material.

## EPA Takes Corrective Action on Standards for Coal

These alternate capacities require various times for construction and incorporation into plant operations. SCS Engineers works with clients to develop long-term strategic business plans that address solid waste infrastructure needs. The low end of the time range is derived from stakeholder provided information indicating that all the other phases of constructing the basin can happen concurrently with permitting, resulting in completion of the basin in 18 months.

## Frequent Questions about the 2015 Coal Ash Disposal Rule

Retrofit of a CCR surface impoundment: 31.

## Environmental

The processing plant recovery is about 70 % and 0. Solid Waste Planning National Experts: and Taken together, the collection, recycling, and disposal of solid waste are among the costliest of municipal services.
