

EMP protection for AM radio broadcast stations.

Department of Defense - Nuclear Warfare Military Manual Photocopies

RF Power Reference Chart			
Frequency	Power	Notes	Notes
540-1600	1000	Maximum power for Class A stations	
540-1600	500	Maximum power for Class B stations	
1600-5400	1000	Maximum power for Class A stations	
1600-5400	500	Maximum power for Class B stations	
5400-10000	1000	Maximum power for Class A stations	
5400-10000	500	Maximum power for Class B stations	
10000-15000	1000	Maximum power for Class A stations	
10000-15000	500	Maximum power for Class B stations	
15000-20000	1000	Maximum power for Class A stations	
15000-20000	500	Maximum power for Class B stations	
20000-30000	1000	Maximum power for Class A stations	
20000-30000	500	Maximum power for Class B stations	
30000-40000	1000	Maximum power for Class A stations	
30000-40000	500	Maximum power for Class B stations	
40000-50000	1000	Maximum power for Class A stations	
40000-50000	500	Maximum power for Class B stations	
50000-60000	1000	Maximum power for Class A stations	
50000-60000	500	Maximum power for Class B stations	
60000-70000	1000	Maximum power for Class A stations	
60000-70000	500	Maximum power for Class B stations	
70000-80000	1000	Maximum power for Class A stations	
70000-80000	500	Maximum power for Class B stations	
80000-90000	1000	Maximum power for Class A stations	
80000-90000	500	Maximum power for Class B stations	
90000-100000	1000	Maximum power for Class A stations	
90000-100000	500	Maximum power for Class B stations	

Description: -

-EMP protection for AM radio broadcast stations.

-EMP protection for AM radio broadcast stations.

Notes: Prepared with Office of Civil Defense. TR-61-C.

This edition was published in 1972

AM Station Classes, and Clear, Regional, and Local Channels

Any thing with a tightly wound coil transformers will be damaged.

What Will and Won't Survive an EMP

Most likely, there will be 12 or more.

AM Station Classes, and Clear, Regional, and Local Channels

Put switches on critical outlets and learn to rotate what items are plugged in or turned on at any one time. Good luck None of these ideas have been tested in any way, even by a simulated EMP.

Your Fallout Shelter Reading List

In a normal radio the antenna collects the energy that is sent to the circuits and demodulated into communications like voice or music.

AM Station Classes, and Clear, Regional, and Local Channels

Similar to a Faraday cage, it provides 98% military-grade protection against electromagnetic waves.

EFFECTS OF NUCLEAR EMP ON AM RADIO BROADCAST STATIONS IN THE EMERGENCY BROADCAST SYSTEM. (Technical Report)

The problem with an EMP is that it also fries the generators—even those that are not plugged in. Section 4 compares natural lightning and EMP. Most of the time you listen and only transmit when required and in a dangerous situation you may not even want to transmit at all because you may reveal your location, it is very easy to find by radio triangulation.

EFFECTS OF NUCLEAR EMP ON AM RADIO BROADCAST STATIONS IN THE EMERGENCY BROADCAST SYSTEM.

(Technical Report)

Vehicle manufacturers have been hardening vehicles against surges and electrical spikes for some time now and the testing has proven to be true after DOD testing. Also, the sensitivity of the electronic circuitry to EMP has increased due to the use of smaller electronic components designed to operate on lower voltages. EMP mitigation is a lot like most aspects of prepping, you do the best you can with what you can afford and keep spares of critical devices if you can afford them.

EMP Proof Cloth. Easy EMP Protection For Your Car And Generator

I HOPE these links are useful and informative to at least a few people. You could verify this with a multi-meter for conductivity. I get to use it once or twice a year when the power goes out.
