Sustainable Development Plan

Volunteering We encourage all colleagues to demonstrate our values by contributing to local communities.

London Stansted Airport

The project is expected to cost £130m, and, once completed, will make London Stansted the only airport in the UK with dedicated arrivals and departures terminal buildings. Let us know in the comments. NWEHPA immediately recognised that a major initiative would be needed to resist these proposals and an open invitation was extended to local organisations and individuals to help form a campaign group to oppose the expansion of Stansted Airport.

Stansted Airport

The building services team of SPIE, an electrical and mechanical engineering and HVAC services provider, was awarded a contract during the second phase of the terminal transformation project. The noise section of our website is designed to help give a better understanding of the various aspects of aircraft noise by giving clear and factual information. The layout of the security search area will be modified to enhance the passenger screening capacity, as a part of the project.

Aviation Development

Following the event, an amazing £9,308,000 worth of business has been generated for local and regional businesses.
