**Carbohydrates in Food, Second Edition (Food Science and Technology)**

In a 14-day study on normal-weight subjects, three different diets were compared with regard to appetite and ad libitum energy intake.

**State of the art and prospects of methods for determination of lipophilicity of chemical compounds**

Comparison of 40°C and 65°C soluble fractions, Carbohydr. These applications, particularly the latter, are obviously very extreme examples of monosaccharide analysis. For precision and accuracy, each step must be stoichiometric.

**State of the art and prospects of methods for determination of lipophilicity of chemical compounds**

Acetate gradients allow the separation of mono-, di-, and oligosaccharides in one analysis and within a reasonable run time. Sample preparation time is also likely to be shorter because extensive clean-up is often not required.

**Technical Note Compendium for Solid**

Yoshikawa M, Morikawa T, Matsuda H, Tanabe G, Muraoka O 2002 Absolute stereostructure of potent  $\alpha$ -glucosidase inhibitor, salacinol, with unique thiosugar sulfonium sulfate inner salt structure from Salacia reticulata.
