### An Overview On The Disorders of Excretory System

People with this disease produce insufficient levels of insulin. Epidemiology In men, roughly 2-3 cases per 10,000 are treated as outpatients and 1 in 10,000 cases require admission to the hospital. Other Excretory Organs Apart from the above-mentioned organs, there are.

### Excretion

Glucose, amino acid, salts and water are reabsorbed by various parts of the nephron and finally, they enter into the surroundings blood capillaries.

### Anatomy and Physiology: The Excretory System

Urethra The urethra runs through the penis in males, and serves as a carrier of semen as well as urine for their ultimate discharge out of the body.

### Crustacean

Urethra In anatomy, the from — ourethra is a tube which connects the urinary bladder to the outside of the body. This system consists of specialized structures and capillary networks that assist in the excretory process. A sphincter muscle around the urethra at the base of the bladder controls the flow of urine between the two.
