### Land use planning in Canada

Ontario farmers are proud to cultivate some of the most fertile and productive soils in the world and OFA fervently believes that all Ontarians benefit from the

Filesize: 16.43 MB

economic and environmental benefits productive land and water bring to our province.

### AgMaps

Natural heritage features are scattered across our agricultural landscapes. Class 3 - Soils in this class have moderately severe limitations that reduce the choice of crops or require special conservation practices.

### Guideline on community emissions reduction planning

The OFA also endorses the use of the MDS formulae to provide sufficient separation between new or expanding agricultural livestock buildings and uses and neighbouring non-agricultural buildings and uses, again to lessen the likelihood of odour complaints. Comparing the 2011 and 2016 censuses showed a decline in the area of farms; this time from 12.

### CAPP

Organic matter content of the cultivated surface is less than 2%. This has been interpreted as a sign of weak commitment to the environmental goals of the Growth Plan and Greenbelt Plan, in favour of infrastructure development to support economic growth.

### OFA Consolidated Agricultural Land Use Policy

More technical arguments have also been made regarding the method in which density targets have been calculated, including concerns over the

lack of net density calculations. In general, municipalities have the major role in land use planning in Ontario.

### **AgMaps**

Refer to for more information. Free Daily News Group Inc. OFA supports the urban intensification to protect agricultural land.

### **OFA Consolidated Agricultural Land Use Policy**

Ontario's smallest municipality by population is the with 0 residents, while the smallest by land area is the Village of at 1.

### **Real Property Policies and Procedures**

About Osler Osler is a leading business law firm practising internationally from offices across Canada and in New York. The GGH will function as Canada's principal international gateway and will have a high standard of living and exceptional quality of life. Implementation and Conformity The proposed Methodology does not preclude municipalities from considering alternate assumptions about population and employment growth to the horizon of the Plan.
