Plants and Animals in Washington // LandScope America

South America is home to a vast array of species endemic to the region. Giant anteaters have sharp claws that help them dig through anthills or defend themselves against predators.

What Animals Live In South America?

North America's coastal rain forests contain some of the world's most valuable commercial timber lands.

Animals In South America Rainforest

A plant can be annual living for one season , biennial living for two years , or perennial living for many years. In the high elevations of this region, whitebark pine trees are sustaining heavy losses from white pine blister rust, successive waves of mountain pine beetle and the impact of fire suppression. Amazon rainforest animals set the fashion curve for south america.

Rainforest Plants and Animals

Damage is greatest in dry tropical forests where firewood cutting converts forests to savannas and grasslands. Shrubs often are deciduous as well, and will lose their leaves during winter.

Threats to Wildlife

They have been heavily harvested, particularly in the southern third of the bioregion. Their fragile and regularly brilliant blossoms have a novel shape, and there are different varieties to experience.

Vegetation is by no means uniform throughout the continent; its distribution is determined by climatic, geographic, soil, and sometimes anthropic human-related differences. The few large predators in the deciduous forest include timber wolves, bears, mountain lions and bobcats. Their bills can grow up to 9 inches 23 cm long and may seem heavy from the point of view of onlookers.

Elsewhere in the northern hemisphere, Norway contains small fragments of coastal rain forest, but the forests formerly found along the west coasts of Ireland and Scotland, in parts of Iceland, and in a narrow crescent along the eastern shore of the Black Sea are long gone. Through transpiration, the enormous number of plants found in rain forests return huge amounts of water to the atmosphere, increasing humidity and rainfall, and cooling the air for miles around.
