

Herons, egrets and bitterns - their biology and conservation in Australia

CSIRO Publishing - HERONS, EGRETS AND BITTERNS Their biology and conservation in Australia docx

Description: This is the first book to deal exclusively with the Australian members of the Family Ardeidae. It is an easy-to-read account of their origins, classification and biology, and explains the features that distinguish them from other birds. This book covers the distribution and movements, feeding, breeding, population dynamics and conservation of the 14 Australian species. Also includes a chapter on the six species that are occasional visitors to the continent

Melaleuca timber has historically been used for marine pilings, knee joints for vessels, framing and flooring.

Melaleuca forest

It occurs mainly as areas of low woodland forest across estuarine plains and seasonal swamps in the coastal and near-coastal areas of monsoonal northern Australia. The foliage of several species contains essential oils such as tea-tree oil that have medical and pharmacological uses.
