The 15 Most Common Health Concerns for Seniors

Health is such an important subject that we too often take for granted until we lose it.

Health in the later years (2000 edition)

According to CDC data, diabetes caused 54,161 deaths among adults over age 65 in 2014.

Sexuality in the later years — the impact of health and body

This can be helped by changing positions or by emptying the bladder before and after sex. While you're still healthy and able, make decisions about potential living arrangements, like a nursing home or assisted living facility, hospice care, home health care, and other available care options, depending on your condition.

Optimizing Health in Later Years: Understanding the Needs of the Aging Population

Deciding whether to have this surgery can leave both women and their partners worried about their future sex life.
