Cognitive Development In School

Daphna Shohamy researches learning, memory and decision making.

The Faces and Minds of Psychological Science

Collaboration Not Conservation As noted in the introduction to this section, history shows that it has been quite difficult to maintain a balanced view of the role of social interaction in cognitive development. The observational literature suggests that short-term outcomes are more sensitive to social support, while longer-term outcomes, including survival, are most powerfully influenced by social networks Glass 2000. The future of mind control.

The Faces and Minds of Psychological Science

The development of self in children and its relation to the organization of behavior is a promising avenue for studying cognition-emotion relations. His empirical examination of happiness has contributed enormously to the understanding of human well-being.
