## Department of Health

Divin N, Harper P, Curran E, Corry D, Leavey G 2018 Help-seeking measures and their use in adolescents: a systematic review. Year two of the programme focusses on assessment, planning, intervention and evaluation of care. This is the next level of care in the NHS.

## PAR

Tell the assessor if this is important to you. For information about NIH's commitment to supporting a safe and respectful work environment, who to contact with questions or concerns, and what NIH's expectations are for institutions and the individuals supported on NIH-funded awards, please see. Patients in secure units are usually detained under the Mental Health Act and present a level of risk greater than general mental health services could safely deal with.

## PAR

Promoting early autism detection and intervention in underserved communities: Study protocol for a pragmatic trial using a stepped-wedge design.

## Chapter 9

The AOT is also known as the complex care team CCT or programme of assertive community treatment PACT. They may be encouraged to help the individual to seek help from the mental health professional. The details of the individual studies can be found in Table.

## **PAR**

It covers specialist community and hospital care. They can share information with other professionals if they are worried about your safety, or the safety of other people. Applications will be assigned on the basis of established PHS referral guidelines to the appropriate NIH Institute or Center.
