## Social Class Indicators and the Relationship Between Learning Disabilities and Juvenile Delinquency on JSTOR

This inequality in treatment exists even when factors such as poverty, behavior and attitudes, academic performance, parental attention, and school governance are considered. No mention was made of any programs to assist children with disabilities who have had contact with the juvenile justice system. Keilitz and Dunviant 1986 , for example, developed a model based on personal risk factors, including external attribution for negative events, impulsivity, and lack of anticipation of consequences; and environmental risk factors, such as school failure, association with students who have behavior problems, detachment from school rules, and economic incentives to commit crimes.

## Social Class Indicators and the Relationship Between Learning Disabilities and Juvenile Delinquency on JSTOR

Should you need assistance during this time, please feel free to contact the firm by phone at , through our confidential web contact portal , or via fax at 847 564-8419. Community Factors Juvenile crime is higher in urban areas and in socially disadvantaged neighborhoods McCord et al. Three hypotheses have been proposed to explain why individuals with learning disabilities are more likely to become delinquent than non-learning-disabled individuals.

## Some observations on the link between learning disabilities and juvenile delinquency

Parents with children who were delinquent, however, did not report as many modifications. Research has shown that under these guidelines, prosecutors rather than judges exercise greater discretion, through their charging and plea bargaining practices, about how cases are handled Forer 1994; Tonry 1999. Sanchez-Way and Johnson 2000 outlined factors that are the most effective in preventing and decreasing substance abuse for American Indian youth.

## Social, Emotional and Behavioral Challenges

Groups met for 90 minutes each week for 12 weeks, and individuals participating in groups were also visited once by a therapist.

### **Learning disabilities, crime, delinquency, and special education placement.**

Delinquent peer associations may also be a consequence of school failure when a student comes to reject academic achievement and prosocial behavior as legitimate goals and values. The susceptibility hypothesis lacks empirical testing, and the concept of susceptibility appears to be too global to be systematically testable.

### **Juvenile Delinquency**

Much of the evidence at this point is contained in ethnographic studies of youthful gang members and drug dealers Bourgois, 1995; Chin, 1996; Moore, 1978, 1991; Padilla, 1992; Pinderhughes, 1997; Sullivan, 1989; Vigil, 1988; Vigil and Yun, 1990. New York: Cambridge University Press. Some lawbreaking experience at some time during adolescence is nearly universal in American children, although much of this behavior is reasonably mild and temporary.
