## Aristotle's Logic (Stanford Encyclopedia of Philosophy)

As the language of Roman aristocrats and scholars, Greek died off along with the Roman Empire in the West, and by 500 CE, almost no one in Western Europe was able to read or translate Greek texts, and with the rise of the Islamic Empire, the west was further cut off from the language. This revival was, at least in part, independent of him. Among these works, the Categories continued to enjoy a special status.

## Arab Transmission of the Classics

No one can read the De unitate intellectus, written in the same brief period when some dozen commentaries on Aristotle were written by a Thomas Aquinas extremely busy with many other things, without seeing that Thomas took his first and primary task to be getting the Aristotelian text right.

## Commentators on Aristotle (Stanford Encyclopedia of Philosophy)

The translators made slight emendations here and there, Pirotta's not being a critical edition, and they translated the Latin version of Aristotle which stands at the head of the lectiones in the Pirotta edition. The existence of two commentaries written in a different format on the very same treatise by the same author has to be understood in the light of the fact that these commentaries were teaching tools and were used to teach students with different skills and different levels of familiarity with the Categories. With the aid of Greek and other ideas, in particular quickly became the most heavily populated and thriving area in Europe.
