### Local area network

Through a virtual point-to-point connection, users can access a private network remotely. An AAA server is typically the RADIUS server used for a WLAN system.

### Local Area Networks (LAN) and Wide Area Networks (WAN), Difference between LAN and WAN

The IUB network is an example of a MAN. The computers connected on a SAN operate as a single system at very high speeds. Metropolitan Area Network MAN is a broadband telecommunication network that connects several LANs in close proximity.

### Advantages and disadvantages of local area network (LAN)

.

### Types of area networks

Wide Area Network WAN Slightly more complex than a LAN, a connects computers together across longer physical distances. Each electrical or telecom device on this plan is indicated with the particular symbol.

### Local Area Network

They can be spread across several buildings that are fairly close to each other so users can share resources.

### LAN 101: Networking Basics

Rob Brown - past Microsoft MVP - Windows Insider MVP 2016 - 2021 Microsoft MVP Windows and Devices for IT 2009 - 2020 I know how to create or join homegroup.
