Tundra

The males of these birds definitely live up to their name and are nearly wholly white while females have a greater concentration of black flecks in the white plumage than males. They include , , Snowy Owl, and the magnificent Polar Bear.

Tundra Animals

Insects swarm around the bogs, and millions of migrating birds come to feed on them. There are other plants and flowers that can be found growing on the tundra that will vary according to the season and the location of the tundra climate.

Tundra Characteristics

Even the Arctic tern spends a part of the year in Antarctica. The alpine tundras are slightly warmer with average temperatures ranging between zero degrees Fahrenheit and 54 degrees Fahrenheit.

Tundra Biome: Location, Climate and Vegetation

Approximately 20% or of the surface of the Earth falls into this category.

Tundra Characteristics

Polar bears are the largest type of bear.
