Animals of the Grasslands Printables

A Meerkat can dig through a quantity of sand equal to its own weight in just seconds. They swallow their food without chewing it and later chew the cud to get rid of themselves of parasites.

35+ Incredible Grassland Animals That Might Surprise You

Tiger: These cats love water. It is illegal to disturb or handle some newts in the UK without a license. In the past, badgers were hunted for their meat and hide, but due to conservation efforts they are no longer hunted today.

35+ Incredible Grassland Animals That Might Surprise You

Tigers are located in Asia, in the tropical forests of countries like India, Myanmar and Indonesia, whereas jaguars are located in the Americas, from the jungles of Mexico to the Brazilian Amazon.

Grassland Animals

The grasslands provide animals with a variety of diets like grass, shrubs, twigs and even fellow animals for prey. There are many interesting and unique animal species that call the Tropical Grasslands in Africa home, some examples are: Herbivores: Wildebeest: *Connochaetes*, or wildebeests, belong to the order Artiodactyla, and are also sometimes called gnus.

Animals That Live in the Grasslands

Fox: There are many types of foxes. Giraffe: Is the tallest mammal; the height of an average male is 17ft.
