**Families of Virtue: Confucian and Western Views on Childhood Development // Reviews // Notre Dame Philosophical Reviews // University of Notre Dame**

In many contexts, particularly hospital and outpatient care settings, psychologists are frequently asked to evaluate older adults with regard to depression, anxiety, cognitive impairment, sleep disturbance, suicide risk factors, psychotic symptoms, decision-making capacity, and the management of behavior problems associated with these and other disorders.

RACGP

The model for advance care planning -- legal documents completed by people with decisional capacity -- is insufficient for many people with intellectual disability. Buletin Kesehatan Masyarakat Isu Khas 2000:155—166.

**People with milder forms of autism struggle as adults**

The number of asylums, or places of refuge for the mentally ill where they could receive care, began to rise during the 16th century as the government realized there were far too many people afflicted with mental illness to be left in private homes. Despite the suicides of celebrities and short bursts of pity and understanding of their overwhelming despair, little to nothing has really been accomplished to remove or decrease the stigma of mental illness. Housing issues and realities facing grandparent caregivers who are renters.

**Guidelines for psychological practice with older adults**

Some autistic adults, parents and practitioners felt that they had limited access to research and its findings, and were especially critical of the prevalence of prohibitive paywalls and journal subscription requirements. Professional boundaries in nontraditional settings.

### **People with milder forms of autism struggle as adults**

This, in turn, can lead to discriminatory practices such as an employer refusing to hire, a landlord refusing to rent an apartment, or avoiding a romantic relationship, all due to the person having a mental illness.

### **A qualitative exploration of the perspectives of mental health professionals on stigma and discrimination of mental illness in Malaysia**

Ageism and intervention: What social work students believe about treating people differently because of age. They should not be construed as definitive and are not intended to take precedence over the judgment of psychologists. To help elicit the preferences of people with disabilities with varying degrees of decisional capacity, the Center for Practical Bioethics and Missouri's largest public guardianship office the Jackson County Public Administrator, established Project BRIDGE.
