However, we view logic by viewing the models of a logical language, and taking a valid argument as one for which there is no model in which the premises are true and

the conclusion false. Further, on page 6, the author states that the conclusion comes at the end of the series of sentences that compose it.

Logic I

Relation In a judgment, an assertion is brought under some condition of objective validity. Frege's begriffsschrift is far more powerful than Kant's logic. The first example of quantified predicate logic the author discusses is one that ends up being translatable and valid in sentential logic, so predicate logic ends up being unnecessary.
