This Is China's Real Economic Problem

For the past 40 years, China has been one of the strongest performing economies — transforming itself from a developing economy to an unprecedented level of prosperity. The state sector still contributes approximately 39% to the GDP. In my view, export growth was a significant driver of GDP growth even in recent years when the net exports share of GDP was much lower than 10 or 20 years ago.

Trade War Is Hiding China's Big Problems

America's dependency on China for a broad range of critically important goods is now exposed and decoupling will begin as soon as the U.

Economic Outlook for 2020 Is Good, but Risks Abound

Problems of Chinese Economic Growth 1. They could significantly affect its ability to utilise the global trading system, cross border financial and knowledge flows and international education that have been critical to its growth path to date. The government's 13th Five-Year Plan, unveiled in March 2016, emphasizes the need to increase innovation and boost domestic consumption to make the economy less dependent on government investment, exports, and heavy industry.

Economic and political outline China

There is not much UK government can do about that. Overland fiber optic connections across Asia will speed global telecommunications while reducing reliance on undersea cables or the need for transmissions to transit the United States.

Economic Outlook for 2020 Is Good, but Risks Abound

That drop has clearly hit the Chinese manufacturing sector. Third, the slowdown of economic growth may aggravate the current conditions of weak sectors and regions.
