For quite a big town, it seems a bit odd.

Docklands Light Railway

The Light Railway Order was signed by David Lloyd George on 6 May 1906. A total of eleven units supplied by comprised the first generation of the. In order to build the station the canal had to be diverted, which included the building of a new section from Corn Hill to Broad Street, through a cutting, and through a long tunnel under the railway station drive.

The subway was so bad that it encouraged people to cross on the lines. Plans were developed, before the system opened, to extend it to in the west and in the east. 1960 Civilian traffic facilities cease and last train organised by the Stephenson Society runs 20th March, 1960.

Shropshire's Railways

The northern, southern and south-eastern branches terminate at the National Rail stations at Stratford, Stratford International, Lewisham and Woolwich Arsenal. The depot and administrative base is the Metro Centre, alongside the Wednesbury Great Western Street stop, with tram access and a test track from near the Wednesbury Parkway stop. The entry for the Severn Valley Railway on makes reference to a proposal prior to World War II to link the Severn Valley Line with the Wombourne Branch, with a section being pegged out and some earthworks carried out immediately south of Crossing Cottage near Eardington.

Not Quite Tangible: Extending the Docklands Light Railway

A new has been built 200 metres 660 ft east of the former location as nearby curves precluded lengthening.

Transport & mobility projects
