On the one hand, ethnographers of communication ask what means or media of communication people use in contexts. He focused his research on the contribution of overlap in the organization of turn taking in conversations. The ethnographer participates, overtly or covertly, in people's daily lives for an extended period of time, watching what happens, listening to what is said, asking questions; in fact collecting whatever data are available to throw light on the issues with which he or she is concerned.

Why Ethnography Is Important

There are many definitions of ethnography--creating some confusion in the field of communication, since our researchers read different authors and fields for exemplars. In the friendly conversation, while the event is centered around the telling of a story, the participants contribute randomly to the development and continuation of the conversation. Communicative event 1 requires all three participants to know something about the university environment, Moore Hall, and personal information about each other.
