EU Intervention in Domestic Labour Law, Industrial Law Journal

The newest eu labour law instruments the directive on transparent and predictable working conditions and the work life balance directive acknowledge the need for better protection of workers in new and non standard forms of employment and thus have a broad personal scope of application. The Guidance thus steers away from the most difficult question of all, can a worker refuse to take annual leave during a furlough period when directed to do so by her employer? A number of standard forms have been developed by organizations, associations and conferences for particular goods and routes. Gross loading is the maximum amount of cargo on board, including that needed for navigation functional cargo and not charged.
