At \$2.08 Trillion, Apple Is Bigger Than These Things

Sankar stressed that services is not a single line time, and that may make it harder to grasp than a product homerun. The iPad is thinner than almost any laptop. The Mac was light and sleek when most other PCs were bulky.

• Apple sales by country

The has caught Apple in the crossfire. Each product builds on the sales of the previous one.

Apple (AAPL)

But Apple has to be looking at the EV market as a game-changing product category for its own growth potential and EVs could be the product category which has the most potential to increase Apple's share value.

Apple (AAPL)

Trade tensions between the US and China has to be discussed more with US administration, as Apple is a contributor to the US economy. Only then can a strategy be outlined to penetrate the mainstream market.
