Frontiers

How much do cross-cultural differences in perspectives on the self and should others influence individuals' behavior? These results broaden our understanding of cross-cultural differences in FTP and self-esteem. Ecological system theory, as proposed by , emphasizes that individuals are embedded in a series of environmental systems such as culture, society, and shared beliefs that affect one another. Our study discovered that American undergraduates exhibited greater perseverance regarding the future, and persistence implies the ability to resist current temptations.

ERIC

Intense anxiety experience triggers a threat to the self-concept and is directly associated with lower self-esteem.; The authors in the present volume challenge us to revisit these topics and to reconsider the idea of the self and self-worth.

Nebraska Symposium on Motivation, 2002, Volume 49: Cross

Hence, American undergraduates might have adopted a pessimistic attitude toward the future when considering their career and economic prospects.

Nebraska Symposium on Motivation, 2002, Volume 49: Cross

Parenting and adolescent attachment in India and Germany. A meta-analysis by showed that members of Asian cultures believed that socio-economic status was particularly important to self-esteem, which reflects the self-protection mechanism that exists in those with collectivistic backgrounds. Results Descriptive Statistics and ANOVAs Descriptive statistics for the American and Chinese undergraduates are presented in.

Cross

First, self-esteem has been used as an indicator of validity for the FTP scale in several studies e. For example, future-oriented students will set future goals according to their personal circumstances.

Table of Contents: Cross

However, are FTP scores consistent across different cultural contexts, and how does FTP relate to the self-concept e. You can also use ILLiad to request chapter scans and articles.

Frontiers

Toward dynamic adaptation of psychological interventions for child and adolescent development and mental health.

Nebraska Symposium on Motivation, 2002, Volume 49: Cross

In an article just published in Journal of Experimental Psychology: General, introduce a new perspective on cultural differences in self-construal.
