

Background to environmental planning

Edward Arnold - Environmental Impact Assessment :: Environmental Protection Agency, Ireland

Master of Urban Environmental Planning and Development Program 2006	
Course Title: Master of Urban Environmental Planning and Development Program	
Degree Offered (in full): Master of Urban Environmental Planning and Development (MUEP.D.)	
Responsible Organizations	
The Urban Environmental Planning and Development Program, Faculty of Architecture and Planning, Thammasat University.	
Overview	
The program emphasizes the integrated application of science, technology, social sciences, humanities, and management in order to create advanced urban planning that is responsive to modern society. The aim of the program is to create a good environment and quality of life for humankind. The program is for those who would like to develop higher quality in the highly skilled planners with high ethical standards, in the creation of sustainable urban environments.	
Objectives	
The Master of Urban Environmental Planning and Development Program is a two-year professional graduate degree program with 36 course credits and a 12 credit thesis. The graduates will be trained in a specialized area for two years. The objectives of MUEP.D. Program are as follows:	
1. To produce highly skilled planners of an international standard to serve the profession.	
2. To produce broad knowledge-based planners with capabilities to pursue specialized studies.	
3. To produce competent and ethical planners who would become professional leaders and be able to make contributions in developing the country with responsibility.	
Year of Operation	
The Program began in the Academic Year 2006.	
Applicants' Qualifications	
Applicants should have all the following qualifications:	
1. Hold a bachelor's degree from the Urban Environmental Planning and Development Program from Thammasat University or from other leading universities in Thailand or abroad.	
2. A grade point average (GPA) of 2.50 or higher. A lower GPA is accepted with at least one year experience in planning practice or related field.	
Admissions	
1. Applicants must pass both written and oral examinations.	
2. Applicants must submit an English proficiency test such as TU-GET or TOEFL or IELTS and the test must be within the previous two years.	
Teaching System	
1. The regular education system is based on two semesters per annum.	
2. The Master's program of Urban Environmental Planning and Development requires both class attendance and thesis submission.	
3. Applicants without planning education background must take one or two required

The History of Environmental Justice in Five Minutes

In many cases, air models required an estimate of the emissions because even that part couldn't be measured properly. But such emissions are not just from factories.

Background Information

Non-point source pollution is better understood today to be a very significant pollution factor, and EPA is currently making good progress dealing with it, but it is a very difficult problem. An environment professional is the most common job for environmental science graduates in employment in the UK. Present day Environmental Planning practices are the result of continuous refinement and expansion of the scope of such decision making processes.

8 Conclusions and Recommendations

Proposed developments such as road, group water schemes, wind farms and housing schemes are not licensable activities and in these circumstances the EPA should not be notified.

Environmental Impact Assessment :: Environmental Protection Agency, Ireland

Brownfield projects are now popular and these kinds of projects also built over Brownfield land as well as the Brownfield site.

Planning Introduction

Planning bridges the gap between where the organization stands currently and wishes to be in future. One of the key principles developed in reference to planning and human activity was: Principle 13 In order to achieve a more rational management of resources and thus to improve the environment, States should adopt an integrated and coordinated approach to their development planning so as to ensure that development is compatible with the need to protect and improve environment for the benefit of their population.
