Coping Cat Intervention for Anxiety

Language, Speech, and Hearing Services in Schools, 39, 521—527. J Am Acad Child Adolesc Psychiatry. There is a wide range of acceptable norms within and across individuals, families, and cultures.

Disruptive Behavior Disorders

How can speech-language pathology services help children with speech and language disorders? In a 3 to 5 year follow-up, King et al. Its symptoms are clumsiness, poor balance, irregularity of movements, and inability to perform fine-tuned or smooth movements.

Movement Disorders

Exceptional Children, 62 5 , 399-413. In many cases, working one-to-one with a therapist is enough to help kids overcome their struggles and learn to self-regulate.

Social Communication Disorder

This decreases their stress level. Interventions such as parent training at home and behavioral support in the school can make a difference and parents should not hesitate to ask for assistance.

Interventions for Learning Disorders

These children need to have schedules that are made up of many breaks to help them continue to focus and stay positive.
