シーホース【東京湾 ポートシーバス】

Pre-coated 96-well and 8-well Poly-D-Lysine cell culture plates are also available for generating more consistent suspension cell data.

Seahorse Cell Culture Plates and Accessories

These degrees prepare students for various life science careers and are an excellent entrée to the health care professions.

Subsea

Our solutions are based on the latest in analogue and digital signal processing and our products provide wide coverage monitoring combined with high sensitivity and accuracy. We offer training in multiple disciplines within Biology, including Molecular, Cellular and Developmental Biology, Ecology and Evolutionary Biology, Genetics, Genomics and Bioinformatics, Neurobiology and Behavior, Microbiology, Plant Biology, Biological Clocks, and Physiology and Systems Biology. Subsea is part of the segment Oceans in NORBIT ASA.

Texas A&M Biology

Basic biological research has evolved into a broad, fast-paced and dynamic profession that drives newly emerging industries and actively shapes many human endeavors. Our Graduate Program in Biology offers a diverse range of integrative training opportunities for students seeking a Ph. If you are interested in pursuing a major in one of our disciplines, or if you are currently a student and would like information on courses or the program, we have excellent undergraduate advisors who will be happy to help you.

Seahorse Cell Culture Plates and Accessories

Seahorse XF cell culture plates have been developed specifically for XF Analyzers to maximize the sensitivity of the sensor cartridge measurements, in order to provide valuable functional metabolic data from living cells, isolated mitochondria, islets, and spheroids. About Subsea Subsea designs and develops wideband multibeam sonars for hydrographic applications, forward-looking applications as well as advanced subsea leakage detection.

Seahorse Cell Culture Plates and Accessories

Seahorse XF cell culture plates are tissue culture treated for optimum adherence and growth of mammalian cells.
