Excavations at Cerro Azul, Peru : the architecture and pottery (eBook, 2008) [perssongroup.materialsproject.org]

. In the 1980s, however, fishing was being done with nylon nets and watercraft unavailable in Late Intermediate times.

Islas del Perú: Cerro Azul: arqueología, ecología y algo más (Parte II)

In 2015 preliminary excavations were aimed at determining whether the kiln was intact. During the course of excavation, the University of Michigan Project excavated two tapia buildings in their entirety, saving every sherd from every room, walled work area, feature, and midden.

Excavations at 38ak172 : The Hitchcock Woods Pottery 2015, Paperback by Steen... 9781515204497

Desde la cima del acantilado de El Fraile pude apreciar en el mar a un grupo de delfines, cuales tritones o sirenas nadando y surcando las aguas del océano, sin reposo, en busca de su diario alimento. We note that our list of Late Intermediate species is only two-thirds as long as the list of fish Marcus and Flannery collected at Cerro Azul in the 1980s Table 6. First, Marcus found two small rooms in Structure D that had clearly been set aside for the raising of guinea pigs.

Cerro Azul: Arqueología, Ecología y Algo Más (Parte II)

During the course of excavation, the University of Michigan Project excavated two tapia buildings in their entirety, saving every sherd from every room, walled work area, feature, and midden. What individuals are featured in these paintings? The reason for this is that Chimú rulers practiced split inheritance, which dictated that the heir to the throne had to build his own palace and conquer his own territory after the death of a ruler; all the rulers wealth would be distributed to more distant relatives.
