## The Pharmacopoeia Londinensis 1618 and its descendants

An attempt was made to simplify further the older formulae by the rejection of superfluous ingredients. If the physician were to use the same article under its pharmacopoeial name when the patented article is prescribed, they would become open to prosecution by the patentee for infringement of patent rights. All the notes that were in the margent are brought in the book.

## THE MYSTERY ABOUT THE FIRST ENGLISH (LONDON) PHARMACOPOEIA (1618) on JSTOR

This would not be the case if the trade synonym were omitted.

## A medical history of smoking, from cure to killer

Rosa damascena essential oil is composed of hundreds of components, including citronellol, citral, carvone, citronellyl acetate, eugenol, ethanol, farnesol, stearpoten, methyl eugenol, nerol, nonanol, nonanal, phenylacetaldehyde, phenylmethyl acetate, and phenyl geraniol. In 2015 he was awarded a Royal Society of Literature Jerwood Award for non-fiction. The London apothecary John Quincy, for example, recommended treating bruises with a powder whose ingredients included Armenian clay, rhubarb and mummy — rather more trouble to get hold of than a tube of ibuprofen gel would be today.

## Pharmacopoeia Londinensis by Culpeper, Nicholas

This did not provoke the slightest reaction, leading several of those present to conclude that their patient was already dead — and they were

probably right. In 1809 the French chemical nomenclature was adopted, and in 1815 a corrected impression of the same was issued. Pharmacopoeia Londinensis: or the London dispensatory, by Nicholas Culpeper, London: printed for Peter Cole, 1649.

An apothecary shop in the sixteenth century, vintage engraved illustration. Moor, which indicates the average degree of purity of many drugs and chemicals used in the arts, as well as the highest degree of purity obtainable in commerce of those used in medicine. As a result, they may have been able to refer to the list of ingredients, but not much else.

### **Pharmacopoeia Londinensis, or, The London dispensatory: further adorned by the studies and collections of the fellows, now living in the said colledg : being that book by which all apothecaries are bound to make up all the medicines in their shops**

This is notwithstanding the fact that, although the medical practitioner is naturally the best judge of the drug or preparations that will afford the best therapeutic result, they are not as competent as the pharmacist to say how that preparation can be produced in the most effective and satisfactory manner, nor how the purity of drugs can be tested.

A pipe or cigarette was a necessary accessory for the doctor, surgeon or medical student, especially in the dissecting room. Wikipedia citation Copy and paste this code into your Wikipedia page. While formularies had previously appeared on the continent, this was the first Anglo-Saxon attempt, and its effect was in general more far reaching than others had been, becoming the forerunner of other editions of the London Pharmacopeia and finally of our own United States Pharmacopeia.
