Lower Permian brachiopods from Wasp Head Formation, Sydney Basin, southeastern Australia

Natural History of New York, Palaeontology, 5 part.

The bivalves megadesmus sowerby and Astartila dana from the permian of eastern australia

Nuevos Bivalvia de la Formación Las Salinas, Paleozoico superior de Chubut, Argentina. In: Field Conference 1994, Capricorn Region, Central Coastal Queensland ed. This find also demonstrates the importance of coprolites as microenvironments of exceptional preservation that contain fossils of organisms that would otherwise have left no trace.

Lower Permian brachiopods from Wasp Head Formation, Sydney Basin, southeastern Australia

The geology of the Yarrol region. Boletín Dirección Nacional de Geología y Minería 114: 1—81. The eastern edge of the Southern Highlands plateau uplifted along with the Blue Mountains around 70-35 million years ago.

Legacy Bulletins

The size of these is consistent with the impressions of the individual sheets of crystallites that comprise sheet nacre , but their poor preservation and sporadic occurrence leaves such an interpretation inconclusive.
