## Economic Empowerment

In communities where girls received livelihoods training in entrepreneurship, mobile phone repair, photography, and basic first aid, girls were 23% less likely to be married as children at endline than girls in the control communities. However, the observed heterogeneity was also significant, indicating that different studies point to somewhat different conclusions. Chapel Hill NC : Measure Evaluation; 2008.

## Evaluating the Employment Impact of Skills Training for Jobseekers in Turkey: The Case of İŞKUR's Vocational Training Programs

The review was conducted in accordance with Campbell Collaboration procedures and guidelines on systematic review methods, available at. Only three RCTs were identified, and methodological and reporting shortcomings of the included studies were such that none provided high quality evidence to help answer the review questions. The quality of the existing evidence base is also a concern.

## The psycho

Second, the available evidence does not allow recommendations to be made for, or against, investments in a particular model of TVET. Journal of Economic Literature 2012;50 4 :1051-1079. The full papers of a further 76 items identified through the non-database search were also manually examined.

## Economic Evaluation in Education

The experimental design allows the difference in employment outcomes after the training between treatment and control groups to be attributed to training, and training only. The preparation of this manuscript was unfunded, and the funding agency had no role in the writing of this manuscript, or the decision to submit the manuscript for publication.

## Economic Evaluation in Education

Tripney J, Newman M, Hovish K, Brown C: Protocol: Post-basic technical and vocational education and training TVET interventions to improve employability and employment of TVET graduates in low- and middle-income countries. Relationship of intervention characteristics type to effect size Slight differences in mean effects between two-phase models of TVET and other models were observed, with two-phases usually, but not always, producing the larger effects. Washington, DC: International Center for Research on Women; 2011.
