### **Africa Vetus**

The author has undertaken a review of the literature, conducted an exhaustive investigation in many major libraries and private collections, analyzed these findings, and then compiled information on 174 distinctly separate maps of the African continent. Most of the general detail of North Africa is derived from Ptolemaic geography, as is the depiction of the Nile with its sources in the lakes of the Mountains of the Moon Ptolemy's assumptions about the sources of that river would remain unchallenged on maps of Africa until the end of the 17th century. Delisle exercised care, wherever possible, in the inclusion only of verifiable information.
