Secondly, because exclusive use of Maltese is associated with linguistic purism in the Maltese context and exclusive use of English is associated with snobbism, code switching constitutes a means of avoiding being dubbed as either purist or snob.

### **From Language to Ethnolect: Maltese to Maltraljan**

The adaptations that certain linguistic features of Maltese necessitate in both EAGLES and XCES standards are described, and illustrated with reference to the number system of Maltese nouns, the root and pattern morphology of Semitic Maltese, and cliticisation. Studies conducted on Nigerian English, Indian English, Malaysian English, etc.

### **From Language to Ethnolect: Maltese to Maltraljan**

It is the only Semitic language written in the Latin alphabet in its standard form. The model reveals five fundamental evolutionary phases to any new English: foundation, exonormative stabilization, nativization, endonormative stabilization, and differentiation.
